

Armor 1600/1601 Bluetooth GPS Compatibility Chart

				Last update	11/19/2004
<p>The foam insert in the 1600 and 1601 was designed specifically for the Transplant/Emtac Bluetooth GPS unit. Many other popular Bluetooth GPS units fit in the 1600/1601 with slight modification or removal of the foam in part or whole. If your Bluetooth GPS is not listed please email us the model information and dimensions to info@otterbox.com and we will do our best to let you know if it will work in the 1600/1601.</p>
