

# Preserve Life & Prevent Injury with OtterBox

**“I have owned several OtterBox products in the past including a Defender Series case for my wife’s original iPhone. I have not seen any other cases that have all of the features of the OtterBox.”**

*- Ken Davidson, EMS Lieutenant of Operations*

**Just as an emergency medical service team** works to preserve life and prevent injury, OtterBox does the same for technology. With three lines of protection, OtterBox cases extend the life of smartphones, PDAs and other devices while preventing destruction from bumps, drops and scratches.

**Ken Davidson, lieutenant of operations** for an emergency medical service and rescue team, uses the OtterBox Defender Series™ case to protect his iPhone™ 3G while on the job. As a paramedic supervisor for a large suburban rescue squad, Davidson responds to high priority calls to provide command and support as well as oversees the daily operations of five ambulance stations in Montgomery County, Pa.

**“Based on reputation and performance** of previously owned cases, OtterBox was the first company I turned to,” Davidson said. “I have owned several OtterBox products in the past including a Defender Series case for my wife’s original iPhone. I have not seen any other cases that have all of the features of the OtterBox.”

**The OtterBox iPhone 3G Defender Series case** provides intense protection in the harsh environments Davidson is exposed to every day. With an innovative, clear membrane over the touch screen, Davidson is able to interact with his device in a variety of emergency situations without fear of damaging it. The combination of a hi-impact polycarbonate skeleton and impact-absorbing silicone provides unbeatable protection against drops, bumps and shock.\*

**“So far I am pleased [with the case]** and co-workers who have similar phones have been asking about the case and how well it performs,” Davidson said. “It seems to be doing a good job of protecting my phone. I would recommend it.”

**\*Notes:** Case NOT protected against water. Will provide some added protection against drop, bump and dust. NOT intended for protection against water intrusion.

#### **About OtterBox:**

Founded in 1996, OtterBox is highly respected in the design and production of rugged and semi-rugged cases to safeguard technology and other valuables.

Built upon fundamentals of hard work, creativity and perseverance, OtterBox is the innovator of premier protective solutions for leading global handheld manufacturers, wireless carriers and distributors.
